Art Unit: 3712

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23 & 32-37, drawn to a broach assembly, classified in class 407, subclass 13.
- II. Claims 24-31, drawn to a method for reworking a broach bar, classified in class 29, subclass 592.
- III. Claims 38-42, drawn to a method for forming a blade slot in a turbine disk, classified in class 29, subclass 889.2.
- IV. Claims 43-44, drawn to a gas turbine engine disk, classified in class 416, subclass 223R.

The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the broach assembly can be made by a different process.

Inventions I and IV are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making

Art Unit: 3712

the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the broach can be used to make products other than a turbine disk.

Inventions III and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the disk can be made by a different process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
